Simplify EUDR Due Diligence
From End-to-End

Gain control over EUDR compliance with Source Intelligence's purpose-built SaaS solution. Our platform supports an end-to-end due diligence workflow aligned with regulatory requirements—helping companies trace product origins, assess deforestation and legal sourcing risks, and manage documentation with ease. With advanced automation and built-in regulatory expertise, you'll reduce manual work, improve supplier engagement, and navigate complex obligations confidently.

Our EUDR solution: core capabilities

Our solution brings together sub-tier supply chain mapping, real-time data validation, and satellite-powered deforestation risk assessment. It leverages multi-source environmental datasets and Article 9-aligned scoring to identify risk with precision. A direct integration with EU TRACES enables seamless submission of due diligence statements, and our status as an authorized representative allows us to submit on behalf of clients. With powerful automation and regulatory alignment, our solution streamlines due diligence and reduces compliance complexity.

- ⊘ Sub-tier supply chain mapping
- ⊘ Satellite-based deforestation detection & risk scoring
- ⊘ Automated risk scoring & mitigation workflows
- ⊘ Due diligence statement submissions via EU TRACES integration

How our solution helps you strengthen EUDR due diligence

Enhance supply chain visibility
Track sourcing activity in real time to spot gaps, confirm traceability, and confidently demonstrate compliance.

Identify risks faster
Improve data quality and surface deforestation and sourcing risks earlier—enabling quicker, more informed decisions.

Boost efficiency
Save time and reduce manual work with automation and a direct connection to EU TRACES for due diligence submissions.

Minimize compliance risks
Proactively flag high-risk suppliers and sourcing areas using satellite monitoring, certifications, and harvest location data.

Take the next step toward smarter due diligence & risk assessment

Schedule a demo of our EUDR solution to discover how our solution enables smarter data collection and risk assessment to support more effective due diligence.
