Streamline Human Rights Due Diligence and Mitigate Risk

Gain full control over human rights compliance with Source Intelligence's Human Rights solution. You'll automate supplier engagement, seamlessly collect data, and leverage AI-powered risk analysis to pinpoint potential issues faster. Our solution supports key global regulations—including the Uyghur Forced Labor Prevention Act (UFLPA)—and provides expert-driven templates to help you maintain a transparent, ethical supply chain.

Our Human Rights solution: core capabilities

Built on industry-leading automation and regulatory expertise, our platform provides real-time visibility into supplier practices, making it easier to identify risks and ensure ethical sourcing. Seamless integration with major PLM and ERP systems streamlines data collection and reporting for key global human rights regulations. Whether you manage compliance in-house or partner with our expert-managed services, we empower you to maintain transparency, minimize risk, and adapt to evolving requirements with confidence.

- ⊘ Comprehensive data integration
- ⊘ Effortless documentation generation
- ⊘ Streamlined supplier data collection
- ⊘ Real-time compliance insights

How we help your business enhance transparency

Identify risks faster
Artificial intelligence (AI) capabilities improve data quality, delivering insights into critical risk areas and improving supply chain visibility.

Boost efficiency
Automated workflows streamline supplier outreach, and automated documentation generation minimizes manual work.

Mitigate compliance risks
Standardized data collection templates, developed by regulatory experts, ensure compliance data is reliable and actionable.

Increase risk foresight
Our regulatory experts guide our solution development, enabling you to prepare for regulatory changes.

Take the next step toward ethical labor sourcing
