Streamline Minerals Reporting and Mitigate Risk

Effortlessly achieve conflict minerals compliance with Source Intelligence's Minerals Reporting and Due Diligence solution. You'll collect CMRTs from suppliers, track responses in real time, and address other minerals of concern through EMRT and AMRT support—all within a single platform. Stay ahead of evolving regulations and gain confidence in meeting your responsible sourcing obligations.

Our Minerals Reporting & Due Diligence solution: **core capabilities**

Our robust software simplifies supplier engagement, data collection, and reporting to ensure alignment with global regulations. Automated workflows streamline due diligence, analyze supplier responses, and generate audit-ready reports—reducing both effort and risk. Whether you prefer to self-manage your compliance efforts or leverage our managed services, you'll have the tools and expertise to responsibly and ethically source your minerals.

- ✓ Comprehensive data integration
- ✓ Streamlined supplier data collection
- ✓ Real-time compliance insights
- ✓ Effortless documentation generation

How we help your business **enhance visibility and reduce risk**

Identify risks faster

Artificial intelligence (AI) capabilities improve data quality, delivering insights into critical risk areas and improving supply chain visibility.

Boost efficiency

Automated workflows streamline supplier outreach, and automated documentation generation minimizes manual work.

Mitigate compliance risks

Standardized data collection templates, developed by regulatory experts, ensure compliance data is reliable and actionable.

Increase risk foresight

Our regulatory experts guide our solution development, enabling you to prepare for regulatory changes.

Take the next step toward **reliable minerals sourcing**
