

REACH/RoHS Program

Companies doing business in the EU must comply with REACH/RoHS requirements. REACH (Registration, Evaluation, Authorization, Chemicals), requires the registration of chemical substances while RoHS (Restriction of Hazardous Substances), restricts the use of hazardous substances in electronic equipment.

An industry leading, comprehensive solution for REACH & RoHS compliance.

 Access a full list of the Substances of Very High Concern (SVHS) included in the REACH regulation, and updates to the SVHC as soon as they become available.

 Compare your product or materials against the SVHC list, with all of your auditable and reportable compliance documentation on an easy-to-use platform.

 We follow up with your suppliers on a continuous basis to allow evaluation of compliance issues.

 Access your chemical management solution whenever you need it, anywhere in the world.

 Receive alerts and notifications of 3rd party activity.

SUPPORT AND SUCCESS MANAGEMENT

We provide **high human touch** with **24/7 support** and direct access to our **expert multi-lingual team**, based in **San Diego, CA**.

Innovative Technology

We deliver a powerful cloud-based solution with an easy to use, intuitive reporting dashboard.

Data Storage for Seamless Compliance

Using our platform, you can easily conduct outreach campaigns to assess performance, compliance and awareness level.

Ongoing Communication

Maintain constant communication with upstream suppliers and downstream customers. Make it easy for them to load and reference chemical documentation.

Declaration Collection and Storage

We obtain and store compliance documentation and full materials declarations from your suppliers so you don't have to.
