

Smelter Verification Program

The SEC Rule Dodd-Frank 1502 requires issuer's Conflict Minerals Report to include a description of the facilities used to process conflict minerals and the country of origin stating that the facilities refer to the smelter or refiners in an issuer's supply chain.

Access our extensive global smelter database.

Receive quarterly updated smelter reports that include known smelter name, ID and location.

Gain comprehensive understanding of the certification and processing status.

Identify problematic sourcing in your supply chain.

Classify unknown smelters.

Minimize reporting risks.
